Beginnings

Rouly, Inc. is an organization that provides Manufacturing and Field Services for Heat Exchanger needs, as well as Mechanical Services to the Petroleum Industry and its Refineries, Gas Plants, Petrochemicals, Food Processing, Mineral Processing, Cement Manufacturing, and Commercial Fishing Industries both nationally and internationally with excellent worldwide delivery.

Rouly, Inc. was formed almost 50 years ago to service the Petroleum Refineries, Oilfields and Natural Gas Plants of West Texas and New Mexico. Over the years Rouly has built a reputation of prompt service and exceptional quality to its customers. That reputation still exists today.

In 2001, Rouly, Inc. was purchased by its present owner, Robert K. Scribner, Jr. Since that time Mr Scribner has continued to upgrade the company's existing equipment and facilities of an already very successful operation.

Rouly, Inc. continues to further improve and enhance its qualifications by pursuing the ISO 9000 designation which is now in the final stages of sponsorship.

Business Philosophy

Rouly, Inc. is a Heat Exchanger manufacturing and repair company that has exhibited an affirmation to Safety and Quality in its

performance for almost fifty years. Our Employees and Customers are the greatest beneficiary of our Safety and Quality programs.

Rouly, Inc. has established its reputation throughout various industries by building relationships that continue to endure and grow with time. Our service-oriented philosophy has served these customers well, and will continue to be the number one goal in the performance of future projects by Rouly, Inc. Our experience is extensive and verifiable. Our goal is to provide the customer a product or service with the best Quality at a reasonable Cost in the safest manner possible.

Heat Exchangers

Shell and Tube Heat Exchangers as well as Air Fin Coolers are part of a range of products offered by Rouly, Inc to Industry. Rouly's manufacturing facilities have a wide range of product availability, including industrial heat exchangers, pressure vessels, modular equipment and more. Rouly also specializes in the design and fabrication of Pressure Vessels of all types and sizes.

ASME Code Welding

Rouly achieved its A.S.M.E. Code stamp in 1996 and has built shell and tube heat exchangers including TEMA BEM, BED, BFU, AGT, CET & BKU. Rouly can build you a replacement exchanger from your drawing or we can build your heat exchanger to your specification to fit your needs. Rouly Inc. is a full service exchanger shop that can handle all of your exchanger needs from re-tubing to new construction.

Used / Reconditioned Equipment

Rouly has a stock of used equipment that can be returned to like new condition. This equipment includes shell and tube exchangers and air fin coolers. We also have a large stock of fans and louvers. Each unit is completely tested before it leaves our yard.

Manufacturing Locations

Rouly's manufacturing facilities are located between Odessa and Midland, Texas with 40,000 square feet of manufacturing floor area and Hobbs, New Mexico, with 12,000 square feet. Both locations are easily accessible for large trucks with large drive-thru lanes. Our trucks can pick up your exchangers where ever they are, with the first 100 miles free. We have our own machine shop that can handle all of your exchanger needs.

We stock SA-516-70 plate ranging in size from 3/16" up to 3" to handle all your heat exchanger needs.

A commitment to fair pricing, excellent products and continued global expansion remains a top priority with Rouly. We will continue to adhere to the highest standard & provide our customers with cost-effective solutions.

Custom Units

Many industrial processes require customized heat exchangers to perform crucial roles in the design, operation and maintenance of heating systems, cooling systems, power generation systems, refrigeration, petrochemical processing, offshore oil rigging and industrial engineering systems. Rouly Inc. can satisfy your exchanger needs!

Products

Rouly, Inc. maintains a fleet of trucks to transport heat exchangers to and from your site. The fleet is capable of hauling up to 45,000 lbs. There is no charge for pickup and delivery within a 100 mile radius of both the Odessa, Texas and Hobbs, New Mexico.

Rouly personnel are experienced in making emergency repairs in the field and will respond in a timely manner.

Services

Field service and field repair is available 24 hours a day. Rouly, Inc. has a National Board "R" Stamp for maintaining code integrity on field repairs. Tube testing and/or tube plugging can be performed in the shop or on location.

Rouly, Inc. will on occasion provide tubular cleaning in the field and at our shop facility.

Our welding capabilities consist of Stick, MIG, and TIG. We also have qualified Welding procedures for carbon steel, carbon steel to stainless steel, stainless steel to stainless steel, titanium to titanium. We will qualify specific procedures as requested.
